

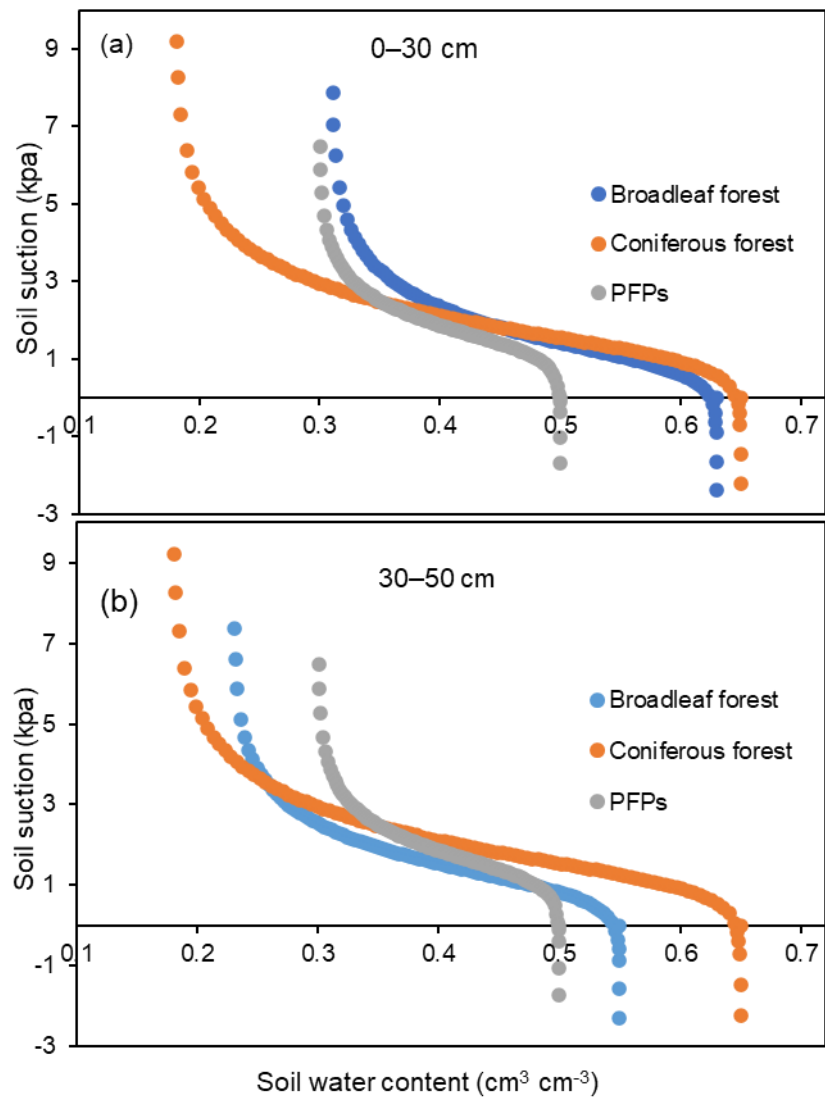

**Figure S1.** Forest ground layer in the coniferous forest (left) and the broadleaf forest (right). (Moss inside the white circle was excluded to better present the litter of the coniferous forest)

**Figure S2.** Sensitivity analysis of saturated hydraulic conductivity of PFPs (Ks\_pfps) to NSE and WB at event scale.

**Figure S3.** Water retention curve of the soil and the PFPs in different depths and forest types.

Table S1. Time and corresponding volume of peak flow in sequence at event scale.

Set-ups	Coniferous forest						Broadleaf forest					
	1 <sup>st</sup> peak	2 <sup>nd</sup> peak	3 <sup>rd</sup> peak	1 <sup>st</sup> peak	2 <sup>nd</sup> peak	3 <sup>rd</sup> peak	1 <sup>st</sup> peak	2 <sup>nd</sup> peak	3 <sup>rd</sup> peak	1 <sup>st</sup> peak	2 <sup>nd</sup> peak	3 <sup>rd</sup> peak
