

Author's Response

Dear Topic Editor,

As proposed, I have successfully restructured and condensed the manuscript to highlight the core contribution more effectively. Specifically, the detailed background and derivational materials previously located in Sections 2.1 and 2.2 have been moved to the Supplementary Material, while the main text now delivers the central point in a much more focused and compact manner (Section 2.2, which was 2.3). The two sections are now condensed into a single Section 2.1, and the later sections are shifted accordingly.

There were a few minor errors in the previous version, which are corrected in addition.

I am very pleased to submit this revised version, along with the new Supplementary Material, for publication.

Lastly, I would like to express my deepest appreciation to the original author, Philip W. Jones, for his exceptional openness, patience, and scientific integrity throughout the review of this rederivation. His constructive and supportive engagement with this correction has been indispensable to the completion of this work.

Sincerely,
SAITO Fuyuki.
