

Dew temperature on 14.03.2023 at several heights above the sea surface.

Dew temperature on 15.03.2023 at several heights above the sea surface.

Dew temperature on 10.10.2022 at several heights above the sea surface.

Time series of current velocity components u and v at 45 cm and 65 cm below the water surface, alongside wind speed, on March 14–15, 2023. Data are shown at 10-second resolution. The left y-axis represents current velocity (m s^{-1}), and the right y-axis represents wind speed (m s^{-1}).
