

Response to the Editor's Comments

Comments: Thank you for your detailed response to my comments in the last review and revising the manuscript accordingly, which clarified several key issues in the study. I think the current format of the manuscript is almost ready for publication after some small edition. I strongly suggest the authors to move Figures S2 and S6 into the main body of the manuscript, given that those two figures have been greatly discussed in the text and are important for understanding some main conclusions of the paper. Currently, there are six figures in the main text and there is still room for more figures. Congratulations in advance.

We are grateful for the Editor's comments. We have moved the Figs. S2 and S6 into the main body of the manuscript.
