

Dear Masashi Niwano,

We thank you very much for your message. I fixed all of your suggested issues and again thank you for pointing them out. Here's the detailed reply:

- L. 307: Figure A6 is referenced earlier than Figs. A2, A3, A4, and A5. Please correct the order of the figures in Appendix A.

→ done: figure order changed to match the reference order in the manuscript

- L. 385: Figure 10 is referred to earlier than Fig. 9. Please correct the figure order in the running text.

→ done: switched figures

- L. 412: Please define the symbol "r_s" here in the running text.

→ added: 'Spearman correlation coefficient' before the symbol r_s

- Figure A1 caption: Suggest rephrasing "Hourly air temperature and wind speed average" -> "Hourly averaged air temperature and wind speed".

→ Agreed and changed.

- Figure A6: Some part of the x-axis label is cut off.

→ fixed

Please let me know if there is anything else we need to provide at this point.

Kind regards,
Julia Martin
