RESPONSE TO THE ASSOCIATE AND EXECUTIVE EDITORS, Nicolas Beaudoin and Florian Fusseis

Authors:

We are glad to hear about the acceptance of our manuscript and the positive words of both editors.

Regarding the condition for the final acceptance of the manuscript, we now provide (check uploaded .zip file) a higher resolution/quality version of the interpreted (figs. 7 and 8) and uninterpreted (fig. B1) seismic lines presented in the manuscript. Original .PNG file was of high quality, it seems that resolution dropped when it was included in the word file and then saved to PDF format.

Thanks for all your work,

Pablo Santolaria on behalf of all the co-authors
