

The authors wish to thank the editorial team for accepting to publish this manuscript.

There are no changes in this upload, the only remaining comment on City and Country of the first affiliation had already been addressed in the last upload (following minor revisions).

The text has been uploaded as a LaTeX file (main.tex) which was used to generate the .pdf and follows the Copernicus template, along with a .bib file for bibliography.

As the main author, I hope everything is in order, and remain available if corrections or additional elements are needed.
