re: manuscript number: egusphere-2025-2761 Title: “Experimental Protocol for Phase 1 of the APARC QUOCA (QUasibiennial oscillation and Ozone Chemistry interactions in the Atmosphere) Working Group”

Dear Dr. Western,

We thank the technical editor for her/his notes. On point 1: My co-author, Dr. Qi Tang (tang30@llnl.gov) confirms that the manuscript previously indicated as “Under Review” has now been accepted. The DOI is still (imminently) pending, however, so, should the technical editor need that information, she/he should contact Dr. Tang directly as I am currently furloughed and unable to complete official NASA duties. On point 2: The manuscript figures and tables all appear in the text before the references in the current version. On point 3: The figure in question has been modified to be color compliant.

I confirm that my coauthors concur with the submission of our manuscript in its revised form. The revised version of the manuscript has been resubmitted electronically.

Yours sincerely,

Dr. Clara Orbe
