Detrended SIE ACC (1992-2017)

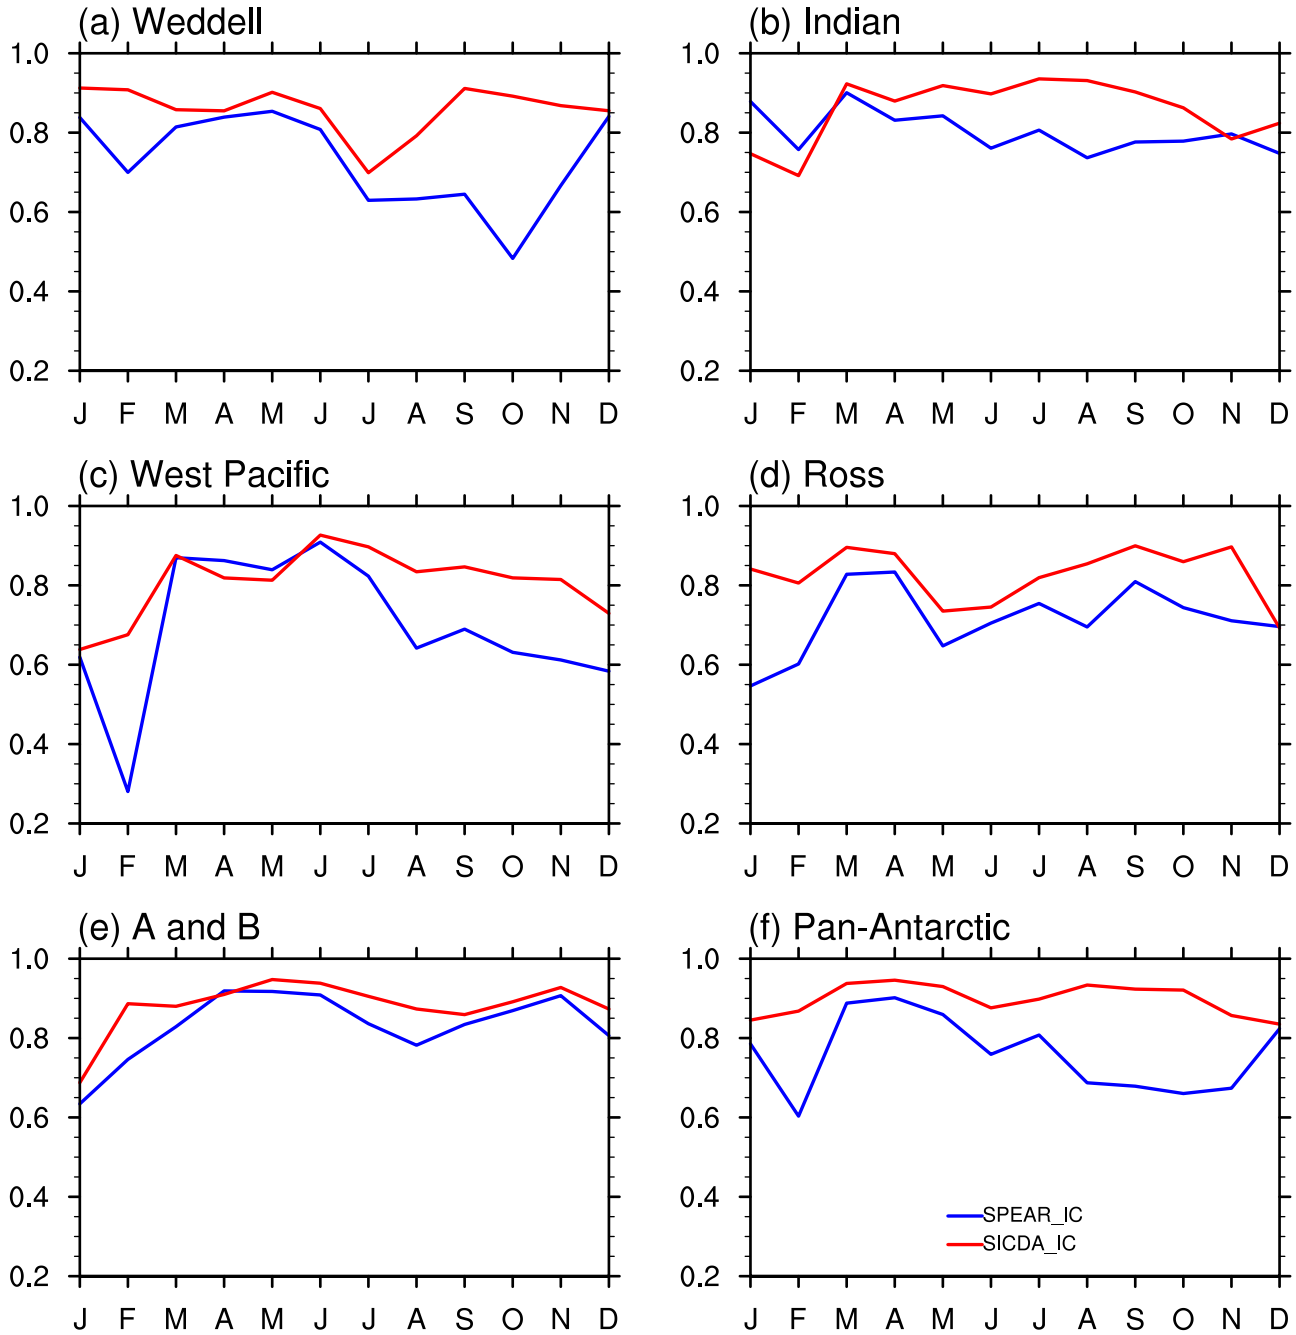

Figure S1. Detrended ACC of regional SIE from SPEAR_IC (blue) and SICDA_IC (red). The detrended ACC values are calculated against the NSIDC SIC observations using monthly SIE from 1992 to 2017.

Detrended ACC (SICDA_IC-SPEAR_IC)

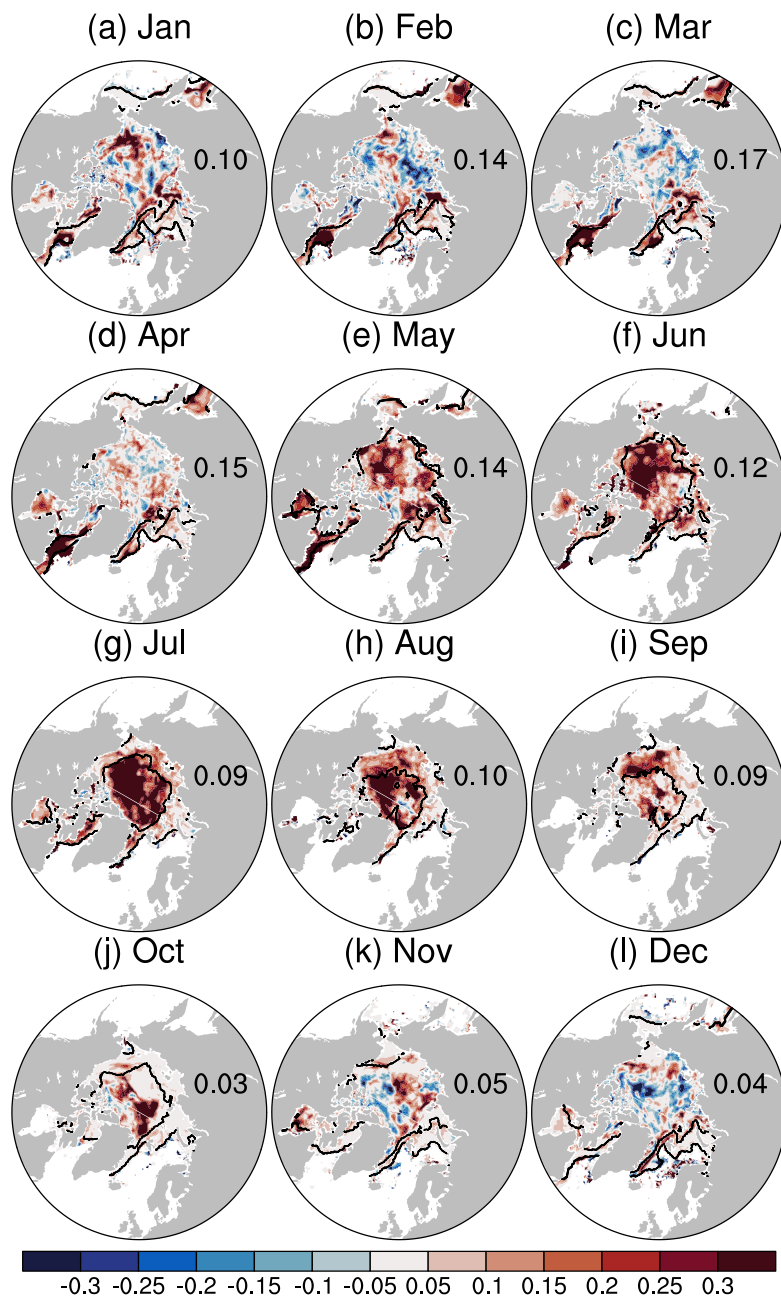

Figure S2. The detrended SIC ACC difference between the two ICs (SICDA_IC - SPEAR_IC) in the Arctic. The ACC The black lines on each map represent the 10% SIC interannual variability zone. The numbers on each map are the area-weighted average of the ACC difference within the 10% SIC variability zone.

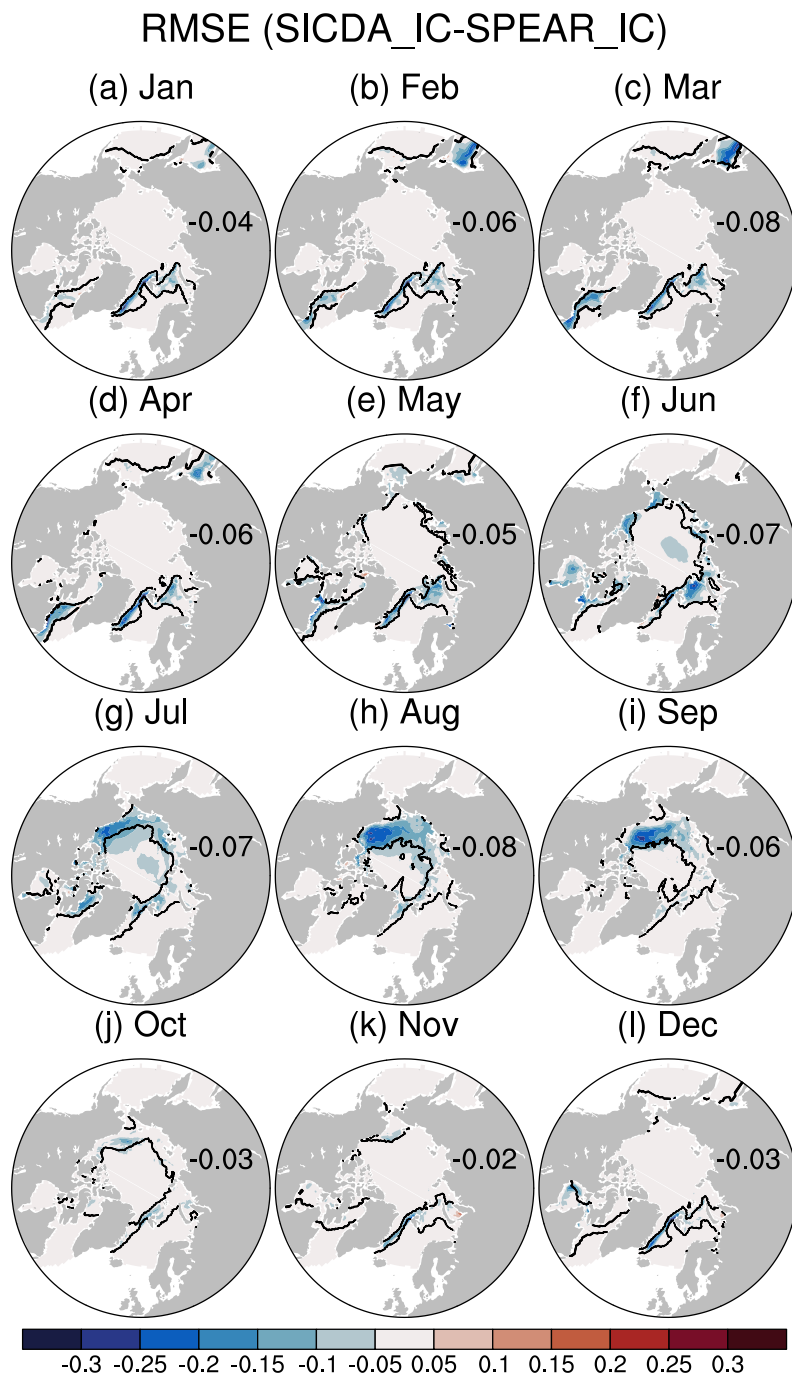

Figure S3. The SIC RMSE difference between the two ICs (SICDA_IC - SPEAR_IC) in the Arctic. The black lines on each map represent the 10% SIC interannual variability zone. The numbers on each map are the area-weighted average of the RMSE difference within the 10% SIC variability zone.

Climatology of SIV (10^6km^3 ; 1992-2017)

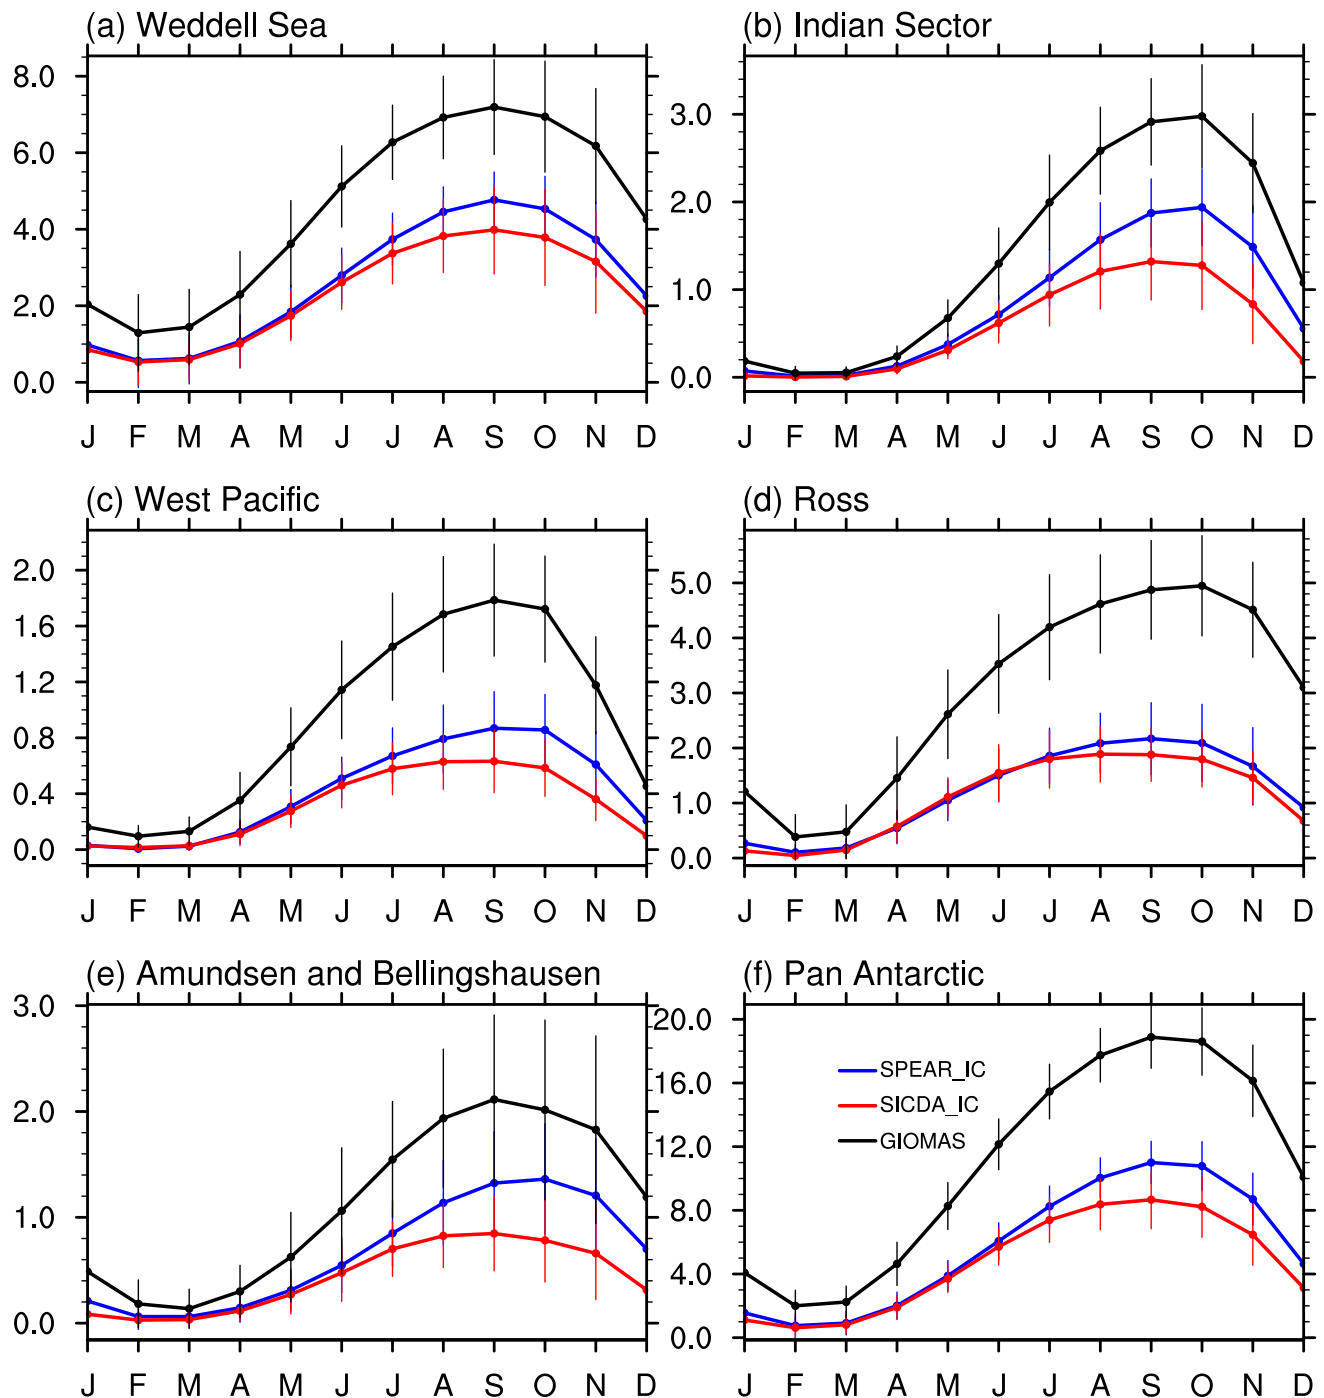

Figure S4. The 26-year (1992–2017) mean seasonal cycle of Antarctic SIV for SPEAR_IC (blue), SICDA_IC (red), and GIOMAS (black). Each error bar represents two standard deviations of regional SIE calculated over the years.

Climatology of SIV (1992-2017)

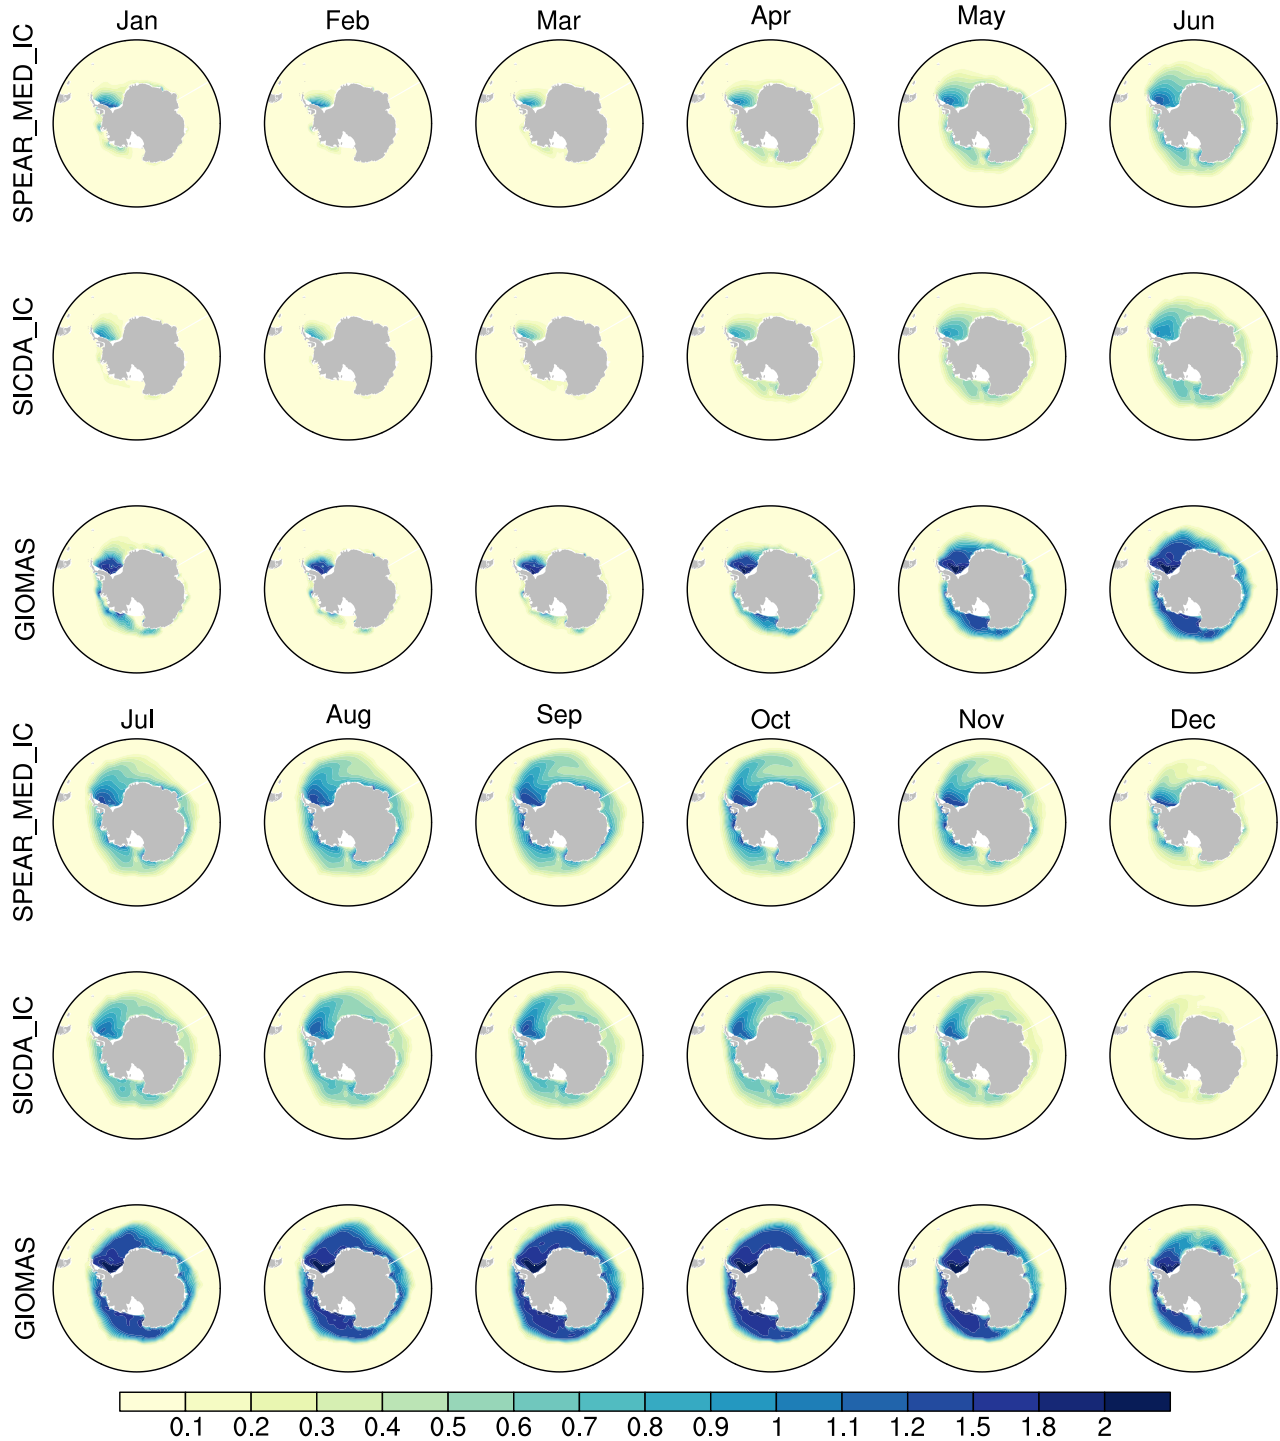

Figure S5. The 26-year (1992–2017) mean Antarctic SIV for SPEAR_IC, SICDA_IC, and GIOMAS.

Detrended ACC (SICDA_MED - SPEAR_MED)

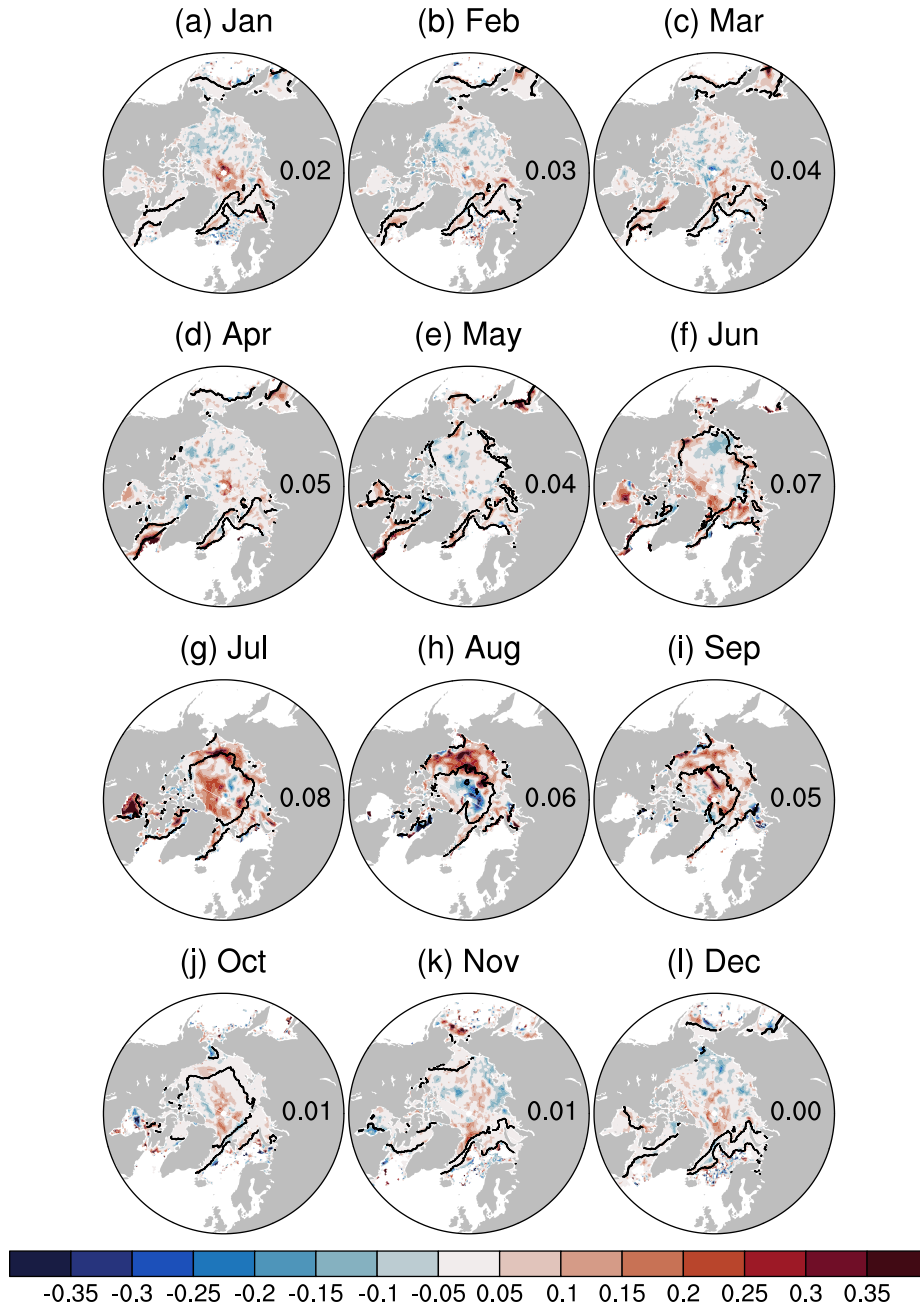

Figure S6. 45-forecast-day mean of the detrended SIC ACC difference between the two reforecast experiments (SICDA - SPEAR). The black lines on each map represent the 10% SIC interannual variability zone calculated based on observations. The numbers on each map are the area-weighted average of the ACC difference within the 10% SIC variability zone.

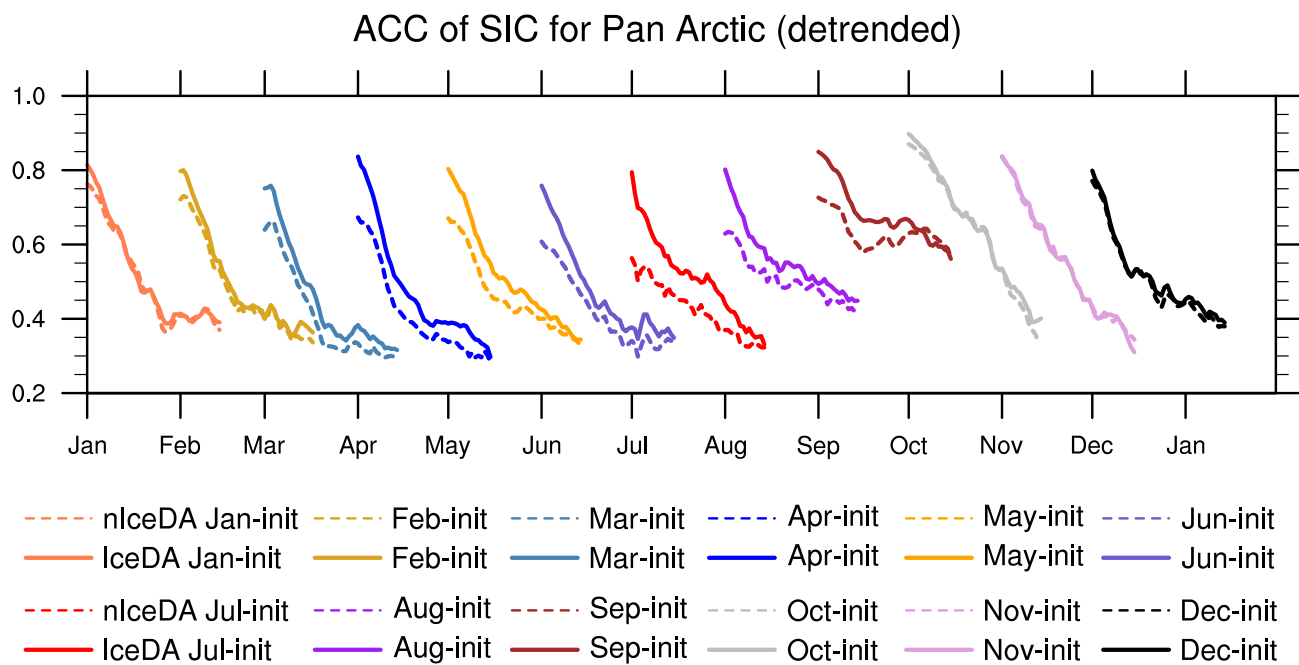

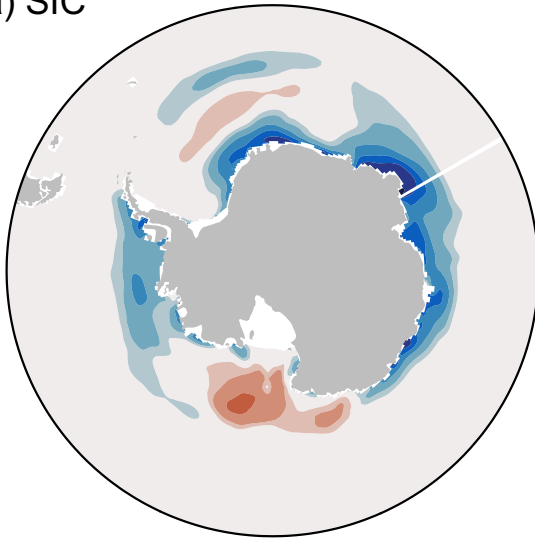

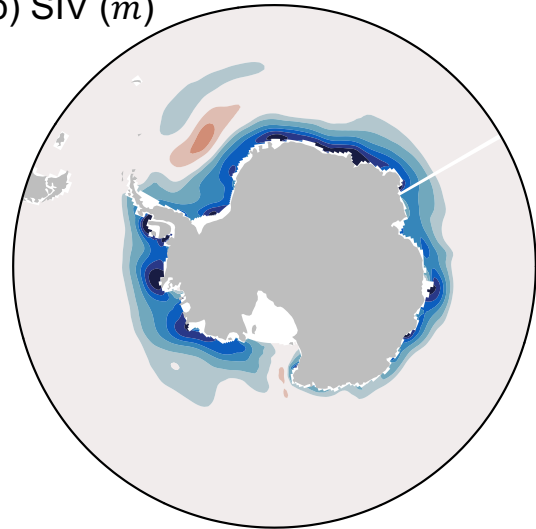

Figure S7. Detrended ACC of SIC as a function of forecasting days from the 12-initialization months for SPEAR_MED (dashed lines) and SICDA (solid lines).

December Monthly Mean States from Dec-initialized Reforecasts (SICDA – SPEAR)

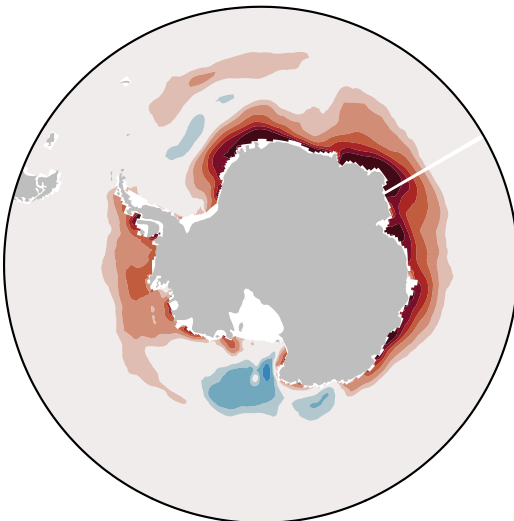

(a) SIC

(b) SIV (*m*)

(c) SW (W/m^2)

(d) SST ($^{\circ}C$)

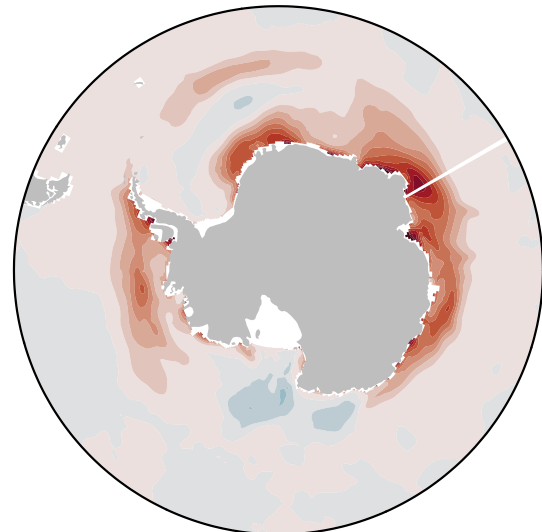

Figure S8. The difference of December monthly mean states between the December-initialized reforecast experiments from SICDA and SPEAR (SICDA – SPEAR) (a) SIC, (b) SIV, (c) SW, and (d) SST.
