

## Report of the minor revisions requested for figures

Dear Jacqueline Reber, Mark Lindsay and Mark Jessell,

We would like to thank you very much for your suggestions to improve the readability of several figures. The following changes have been implemented as requested:

- The axes have been removed for Figs. 2 and 12. This allowed for a slight reduction of the height of both figures as well.
- Font size has been increased in Fig. 4. This required some minor changes to the layout/size of the individual pictures (especially d) and e)).
- Font size has been increased in Fig. 8. This required the position of the numbering within diagrams to shift from the upper left to the lower left, and some other minimal layout changes.
- Font size has been increased in Fig. 9. As the size of the individual legends increased accordingly, its respective position has been adapted for some diagrams to avoid overlap between legend and data bins as much as possible.
- Additionally, we corrected a typo in the author affiliations

Kind regards,  
Friedrich Carl and co-authors
