

Answer to the Editor – technical corrections.

Dear Editor, we would like to express our sincere gratitude for your careful and thorough review of this manuscript. We have incorporated your latest technical corrections prior to publication. We greatly appreciate your dedication and decision to publish.

We have carefully reviewed your comments and set out below how they have been addressed:

Line 257: this was indeed a typographical error, and 'form' has been corrected to 'from'.

Secondly, in Table 2, the alignment of the data in the table has been corrected to match the columns. Likewise, in the column headings, 'catalogue' has been replaced with 'date', and 'SS: satellite sensor' has been removed from the table text, leaving the corresponding heading as 'Satellite'.

Finally, we are grateful for the Editor's detailed and insightful feedback, which has significantly strengthened the final version of this work.
