

Comment: I was a reviewer of the previous versions of this manuscript. The authors have addressed my remaining concerns sufficiently well in this revision. I think the decision to remove the satellite section was sensible. I have only one new issue: the manuscript cites Giles et al (2019a) and Giles et al (2019b), these are the same paper in the bibliography. I assume this is an error in the authors' reference management software. Once corrected I feel this manuscript is publishable in AMT.

Response to Reviewer:

We sincerely thank the reviewer for the evaluation of our work. The duplicate reference to Giles et al. (2019a,b) has been corrected, and only a single entry now appears in the reference list. Thank you for noting this issue.
