

### ***Response to Reviewer 1***

We sincerely thank the reviewer for their review of our responses and our revised manuscript. We apologize for the formatting issues with the tracked-changes version of the manuscript, including discontinuities in line numbering (e.g., the gap from 150 to 315) and the omission of Figure 5 from the PDF. We have reviewed the uploaded files and found these issues only affected the track changes version and the clean (final) version of the revised manuscript does not contain these issues. Please note that the line numbers in our responses refer to the clean version of the manuscript and not the version with track changes.

To facilitate the review process, we have fixed the line numbering and restored the missing figures, including Figure 5, in the track changes version of the manuscript. The line numbering has been carefully reviewed and is now continuous and consistent throughout the document. The corrected tracked-changes manuscript has now been reattached for your review.

We thank the reviewer for their time and constructive comments and look forward to receiving their feedback on our revised version.

### ***Response to Editor***

Dear Editor,

Thank you for your time and consideration of our revised manuscript.

Following the reviewer's comment, we identified formatting issues in the tracked-changes version of the manuscript, including discontinuities in line numbering and an incorrectly displayed figure. These issues have now been corrected. The revised tracked-changes file has been carefully checked to ensure consistency in line numbering and proper display of all figures. No changes were made to the clean version of the revised manuscript, except for one minor update requested by the journal: the caption of Figure 2 has been revised to include the statement "Powered by Esri."

We have reattached both the corrected tracked-changes manuscript and the revised clean PDF for your review.

Thank you again for your consideration.  
Leila Rahimikhameneh
