

Comments for technical corrections:

Editor:

The manuscript is accepted subject to technical corrections. Specifically, following the reviewer suggestions, please ensure the font sizes and overall quality of Figures 1, 5, 6 and 10 match the other figures and please ensure consistent notation throughout the manuscript (e.g., Fig. 3c, d vs. Figs. 3c, d; et al. vs. et al.,).

Reply to reviewer # 1

I thank the authors for their careful consideration of our comments and their work revising the manuscript. I only have a couple of technical considerations for the authors. Specifically, Figures 1, 5, 6 and 10 are a bit hard to read for me, their font sizes and overall quality differ from other figures and it may be beneficial to improve them.

Reply to reviewer # 2

I appreciate the time and effort that the authors spent revising the manuscript. All of my questions have been properly addressed. Please ensure consistent notation throughout the manuscript (e.g., Fig. 3c, d vs. Figs. 3c, d; et al. vs. et al.,)

Reply: The authors are thankful to both reviewers for their continued and in-depth evaluation of the manuscript. All technical errors have been corrected as per your suggestions.
