Dear Editor,

I'm sorry for omitting to update the doi of the zenodo repositories. I have now updated these dois. I use the generic doi that will always resolve to the latest version.

By the way, I checked the original doi of the first version and it seemed to work for me. Anyway, the new doi (10.5281/zenodo.16363995) works, at least for me. It leads to <https://zenodo.org/records/20122244>, which is the latest version (V2), and V1 is accessible from there, too. Sorry again for forgetting this change a week ago. Please note that for some reason, the doi change in that "Code and Data Availability" section does not appear in the track changes pdf.

Sincerely,

A handwritten signature in black ink, appearing to read 'G. Krinner', with a long horizontal flourish extending to the right.

Gerhard Krinner.
