Objet : Second review of article egusphere-2025-3641

Dear Editor,

Please find enclosed the review of our paper entitled **“High resolution Air Quality simulation in the Himalayan valleys, a case study in Bhutan”** to ACP.

As you have suggested, we have changed:

“At last, the creation of a high resolution emission inventory with a bottom-up approach should be a priority of the regional institutions responsible for air quality management”

by

“As a last point, we suggest that the creation of a high resolution emission inventory with a bottom-up approach should be a priority of the regional institutions responsible for air quality management.”

On behalf of all co-authors, I thank you again to have edited our paper.

Yours sincerely,

Bertrand Bessagnet on behalf of all co-authors

On 6 December 2025, Palaiseau, France
