Dear Dr. Rivière,

We have revised the manuscript following your comment on the figure presentation. Most of the figures previously included in the appendices have been moved to the main text and incorporated into the core figures, including the relevant ERA5 plots. Minor clarifications were also made in the text to reflect these changes.

In addition, one figure containing subsidiary results has been moved to a Supplementary Information file, and the appendices are now limited to methodological material.

Thank you,

Tim Whittaker, Alejandro Di Luca
