

Consider making figure labelling more explicit (especially Figures 4 and 5: clarify what 'positive values' represent).

- We've updated Figures 4 and 5 so that the Accuracy Change labels are accompanied with extra text clarifying which direction means more or less accurate.

Consider tightening the speculative statements about visitor motivations in the discussion.

- We've added more qualifying text in the first paragraph of the discussion, noting that we further stress the need to collect data to better understand visitor motivations in the limitations section of the discussion.
