

Author Response to Referee Comment 4

We would like to thank the referee for their careful consideration of our manuscript. Our response is given below, with the comments made by the referee indicated in italics.

- *Perhaps the authors could consider providing additional information, such as some Python scripts for all these algorithms.*

All code used to produce the results of the paper is available on github: <https://github.com/FKamper/seismic-isolation-forest>. While this repository does contain python scripts, we will review its content before submitting a revision of the manuscript and make improvements if necessary. Any updates made to the repository will be made public should the manuscript be accepted for publication.

- *The overall findings or main conclusions are notable, and I recommend publishing the article, but taking into account the suggestions of experienced colleagues who have commented previously.*

Please refer to our responses to the other referee comments.
