

Dear David,

I appreciate your help in getting this piece published, I hope it can be inspirational for others.

The main changes are updating the title of the discussion and adding a short conclusion, as suggested, and I have updated the figure to Vector format. I have made the lesson available at Zendo and made a link in the Supplement section.

I have been through the text, and I am sure that it can “stand alone”, though I hope that people will find their way to the lesson.

Again, thank you for all your help.

On behalf of the authors,

Rie Hjørnegaard Malm
