

**Dear Professor Hördt,**

We are pleased to hear that the reviewers were satisfied with the revisions we made to the manuscript. In the newly uploaded version, we have included — as you requested — a discussion in the *Discussion and Conclusions* section addressing the possibility of fabricating both types of electrodes (*steel-net* and *textile electrodes*) *in situ*, and we have added the appropriate citation for the textile electrodes.

We hope that the manuscript now meets the criteria for publication.
