

Dear editor,

We thank you for pointing out the longitude lines in the main manuscript. We updated Figure 5 in the main manuscript with longitude lines.

In addition to the Figure 5 pointed out by editor, we also updated Figures S8, S9 in the supplementary with longitude lines. We caught that Figure S8a and Figure S9 in the previous submitted version were older versions of the panels (sea level pressure rather than Z500) when updating Figure S8, S9. We corrected these panels for the Z500 plots in this resubmitted version for the production files. The presented results and science do not change after this correction.

I sincerely apologize for not catching this error until approaching the publication, and we thank you for understanding.

Sincerely,
Yan-Ning Kuo, on behalf of the coauthors
