

Multi-level assessment of flood risk perception and flood behaviour

Corrections

Dear Editor,

Thank you for the good news that our paper has been accepted. We made the requested corrections to Tables 6 and 7, where there were indeed minor typos that did not change any interpretation of the results neither the conclusions of the study. Additionally, the affiliation of Oscar Link and Vicente Saenger has been updated to include CIGIDEN R+, a research center that we also thank for providing funding to cover the APC fees.

Sincerely yours,

The Authors
