

Technical corrections for Manuscript

Carbon dioxide release driven by organic carbon in minerogenic salt marshes
egusphere-2025-4621

We would like to thank the editor for their handling of this manuscript and the review process. We have now made the following technical corrections to the manuscript:

1. We have added the phrase 'Powered by ESRI' to the caption of Figure 1.
2. We have corrected the reference list such that journal names are abbreviated and not italicized.
3. We have also edited the reference BSH: Federal Maritime and Hydrographic Agency dataset to say '[last access 25 April 2025]'.
