

Dear editorial team of Biogeosciences,

We have made the final edits to the manuscript egosphere-2025-4755 titled “Combining microbial, isotopic and residence time data to characterize groundwater dynamics in a multi-layered aquifer system in Kurikka, western Finland” according to the final remarks:

1. The “in review” reference Putkinen et al., has been removed from the text and reference list as it has not been published yet.
2. Supplementary material numbering has been checked, current Supplementary material is correct, but we modified manuscript to be consistent with the numbering (see lines 343-346).

On behalf of all authors,

Lotta Purkamo
