Associate Editor  
*Geochronology*

6 January 2026

Dear Dr. Sueoka,

Thank you very much for accepting the revised version of “FAIR fission track analysis with geochron@home” for publication in *Geochronology*. I have fixed the typographical errors mentioned in your decision letter, and have replaced the reference to Boone et al. (2025)’s preprint with the published version, which recently came out. I will pay attention to the typesetting of the directory tree and will change the format to a figure if necessary.

Best wishes for the new year and good luck with the rest of the special issue.

Sincerely yours,

A handwritten signature in blue ink, consisting of several overlapping horizontal and vertical strokes that form a stylized, somewhat abstract representation of the name Pieter Vermeesch.
