

We have removed the following statement from text of the “Competing interests” section, as instructed by the editor: “The peer-review process was guided by an independent editor”.

Figure 3 was updated in the manuscript after the manuscript was accepted, when we realized that ozone data were previously missing for some time periods in the 2021 dataset (June and July). Including those cloud water samples slightly modified the slope of the <50ppbv ozone dataset from  $1.0 \pm 0.085\%$  to  $1.0 \pm 0.084\%$ , and slightly modified the slope of the >50ppbv ozone dataset from  $1.3 \pm 0.29\%$  to  $1.4 \pm 0.27\%$ . These very modest changes do not alter the conclusions of the paper.

The markers used in the manuscript and supplement were also slightly modified for consistency (so that, for example, the 2021 dataset corresponded to the circle marker in Figures 3, 6, 10, S1, S2, S5 and S8). Previously there were a few inconsistencies in the markers used in each of these figures.

The title was also slightly modified to include the word “NY”, since we realized that many of ACP’s readers may be unfamiliar with the location of Whiteface Mountain.
