

Large-scale drivers of compounding hot and dry events in three breadbasket regions

Natalia Castillo Bautista, Marco Gaetani, Leonard F. Borchert, Benjamin Poschlod, Lukas Brunner, Jana Sillmann, Mario Martina.

Response to the Editorial support team, review file validation

We thank the Editors for revising our manuscript files. We have addressed the two points raised during file validation.

We have revised the Code availability section to explain why the scripts are available upon request.

We have also added an explicit reference to Appendix A in the main text at line 209 of the revised manuscript: “see Fig. A1a in Appendix A”. The Appendix title is at line 530. The figures corresponding to the Appendix are uploaded in the zip file as figA”number”.
