

Dear Professor Machguth,

Thank you for your positive assessment and for highlighting these final corrections.

We have revised the Figure 2 caption to clarify that the 24 S2 images were used specifically for classifier development and evaluation.

We have also deposited the adapted Google Earth Engine code alongside the dataset at <https://doi.org/10.5281/zenodo.20417415> and updated the Data Availability section accordingly.

Best wishes,

Dr. Emily Glen
