

Response to Editor's comments

(Q1) First, please properly space this reference in the reference section, as it is on the same lines as Chen et al. 2020a.

Response: We have addressed this format issue, and have corrected other typos in the revised manuscript.

(Q2) Secondly, I think you really need to cite work from Betsy Stone's group on aromatic sulfates. The citation information is below:

Staudt, S., Kundu, S., Lehmler, H-J., He, X., Cui, T., Lin, Y-H., Kristensen, K., Glasius, M., Zhang, X., Weber, R. J., Surratt, J. D., Stone, E. A.: Aromatic organosulfates in atmospheric aerosols: Synthesis, characterization, and abundance, Atmos. Environ., 94, 366-373, <https://doi.org/10.1016/j.atmosenv.2014.05.049>, 2014

I would cite this paper at least in the introduction section when you first mention prior studies measuring aromatic organosulfates from field sites.

Response: We have cited this reference in the introduction section in the revised manuscript.
