Reply to the referee's comments

We thank the referee for the useful comments, which helped us to improve the quality of our manuscript.

In the following, the referee's comments are given in black.

Our point-to-point replies are marked by "R" and are in blue.

Changes to the manuscript text are in green.

Comments by referee #1

The authors have adequately addressed my comments and done a great job in further revising the article. I have no major comments to add. One remaining suggestion is to define the SAL on line 57, when the term first appears.

R:We thank the reviewer for their positive assessment of our revised manuscript and for their constructive feedback. Following the reviewer's suggestion, we have now defined the acronym "SAL" at its first occurrence on line 57.
