

Reply to the Reviewer's comments: "Predictability of cyclones associated with heavy precipitation events in the Sahara" by Ling et al.

Dear Editor, Prof. Silvio Davolio,

We would like to thank you for the opportunity to further strengthen our manuscript.

We have addressed the Reviewer's comments and added the required texts and figures already provided in our previous response to the manuscript.

Additionally, have made sure the discussion of Fig. A6 (previously A4) is more precise, with a better caption description, and specific mentions of the longitudes in the text.

Please see the revised manuscript in a track-changes format.

Kind regards,
Moshe Armon (on behalf of all authors).
