

## **Reply to Editor**

Editor decision: Publish subject to technical corrections

Public justification (visible to the public if the article is accepted and published):

Authors should explicitly state whether AI tools were used in the preparation, generation, editing, or enhancement of any figures, illustrations, schematics, or graphical elements before publication. In accordance with the Atmospheric Chemistry and Physics / Copernicus AI policy, purely assistive AI use for grammar, punctuation, spelling, or readability improvement does not need to be declared. However, any generative AI use, including the generation or modification of figures, illustrations, or schematics, must be clearly disclosed, and the AI tool must be properly cited in the manuscript. Authors remain fully responsible for the accuracy, originality, and integrity of all figure content.

Reply: Thank you very much.

In this study, we did not use AI in the preparation, generation, editing, or enhancement of any figures, illustrations, schematics, or graphical elements before publication. We remain fully responsible for the accuracy, originality, and integrity of all figure content.
