

We appreciate the time and effort that the editor and the reviewers dedicated to providing feedback on our manuscript. We are grateful for the insightful comments and valuable improvements to our paper.

The only thing I noticed in the revisions is that the sentence in Lines 271-273 is not a complete sentence - there seems to be something missing from the end.

Response: Thank you for pointing this out. We apologize for the oversight. We have now completed the sentence in Lines 271 - 273 and added the missing part to make it a complete sentence based on the context. The revised sentence reads as follows:

Line 271-273: It should be noted that the absolute $PM_{2.5}$ and PM_{10} in winter and spring were still relatively high compared to other seasons (Fig.S3), implying that even on NPF days, these seasons experienced higher pollution levels.

The revision will be proofread to avoid similar issues. Thank you again for your careful review.
