

Comment:

Notification to the authors:

The supplement is not mentioned in the paper. Could this be revised? Note that tables in the Supplement have been rotated.

Response:

Thank you for your notification. The Supplement is cited throughout the manuscript through references to Sect. S1, Table S1, and Figs. S1–S8. As the final online link or DOI for the Supplement is not yet available, we would be grateful if the dedicated Supplement statement and corresponding link could be added during production. We will use the Supplement version adjusted by Copernicus Publications, including the corrected orientation of the supplementary tables.
