Response to the Editor's Final Comments

Dear Dr. Timothy Tiggeloven,

On behalf of all co-authors, we would like to sincerely thank you for your positive evaluation of our revised manuscript and for your valuable guidance and support throughout the review process. We also greatly appreciate the time and effort devoted by you and the reviewers to improving the quality of our manuscript.

Following your recommendations and the journal's requirements, we have made the following final revisions:

1. **Manuscript title:** We have replaced the colon (:) with a hyphen (-) in the subtitle and changed the word "System" to "Systems." The updated manuscript title is now:

   "Review Article: Rainfall-Induced Landslide Early Warning Systems through the Lens of the Early Warnings for All Framework - Advances, Gaps, and Perspectives"

2. **Appendix formatting:** We have revised the numbering and labeling of the appendix tables and figures in accordance with the NHESS submission guidelines. The appendix items are now labeled as **Table A1, Table A2, and Figure A1**, respectively.

We sincerely thank you once again for your constructive suggestions, careful editorial handling, and continued support throughout the review process. We greatly appreciate the opportunity to publish our work in *Natural Hazards and Earth System Sciences*.

Sincerely,

Roquia Salam (she/her)
