

Dear Dr. Hall, dear Caitlyn,

Thanks for your feedback on the manuscript. We fully agree that the references in the discussion section were grouped into one small section, making it less obvious how our work relates to literature. Without adding a lot of new text (as you suggested) we created stronger links to topics raised. Just here and there explaining better what others found and how that links, gives indeed more significance to our findings and the discussion section.

Hope that these adaptations line up with your recommendations for improvement!

All the best

Roel
