

Dear Dr. Hall, dear Caitlyn,

Thanks for your very quick response on our version with improved discussion section. We fully agree that indeed the link between literature and our findings could have been pointed out better and we are happy with that improvement.

Many thanks for accepting the manuscript and very happy that it will be published soon now. I sincerely think (and hope) that our work will be recognized by the scientific community and that it will help in the argumentation to keep our field education also in future.

Thanks again Caitlyn!

All the best

Roel
