

Table S4. Sample matching between pre-test and post-test

Category	n
Pre-test responses	55
Post-test responses	52
Matched pre-test/post-test cases	49
Only pre-test	6
Only post-test	3

Note: Matched pre-test/post-test cases constituted the analytical sample for repeated-measures analyses; post-test-only cases were retained for post-intervention appraisal outcomes.
