Additional Figures

Figure S1. (a) Maps of pack (green) and marginal ice (orange) based on GREP monthly output data for 1993–2020. (b) Number of GREP members (0–4) detecting MIZ conditions at each grid cell on the same period.

Figure S2. Probability density function (PDF) of pack and marginal ice SIT computed from GREP climatology in the period 1993–2020 for the selected sub-Arctic sectors.
