This PDF file includes:

Figs. S1 to S2

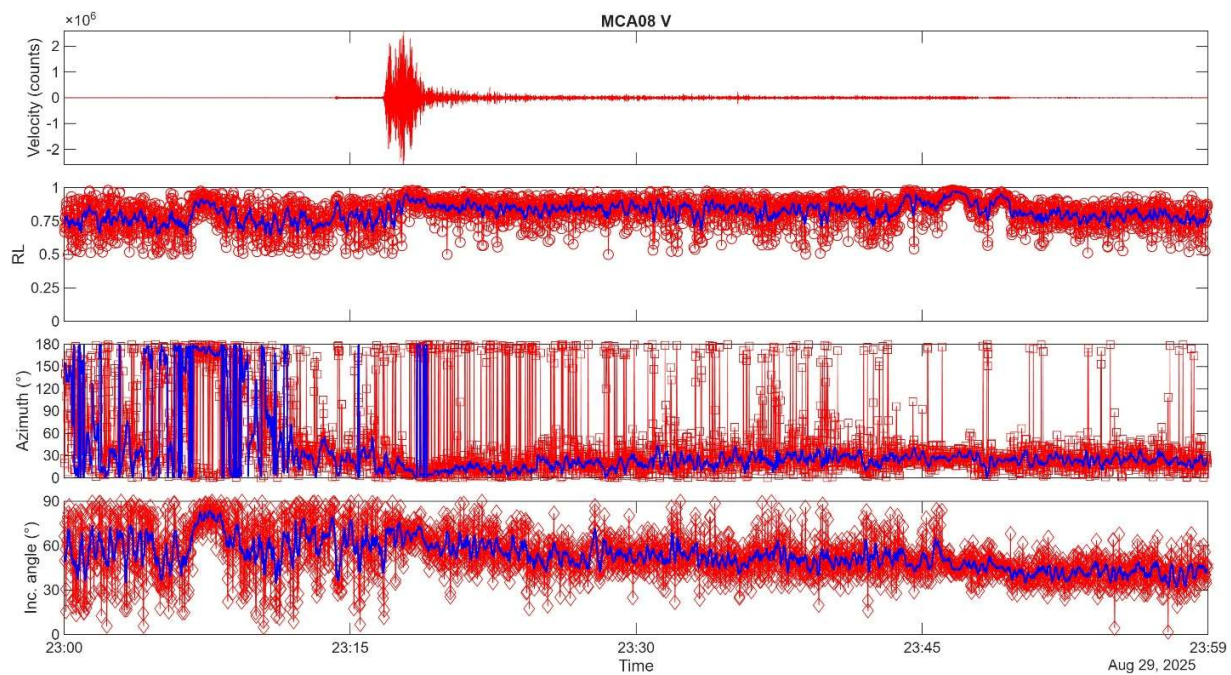

Fig. S1.

Polarization parameters for station MCA08 in the 1–5 Hz band. From top to bottom: vertical component of ground velocity, rectilinearity, azimuth, and incidence angle. The blue line represents the moving average (10-s time window).

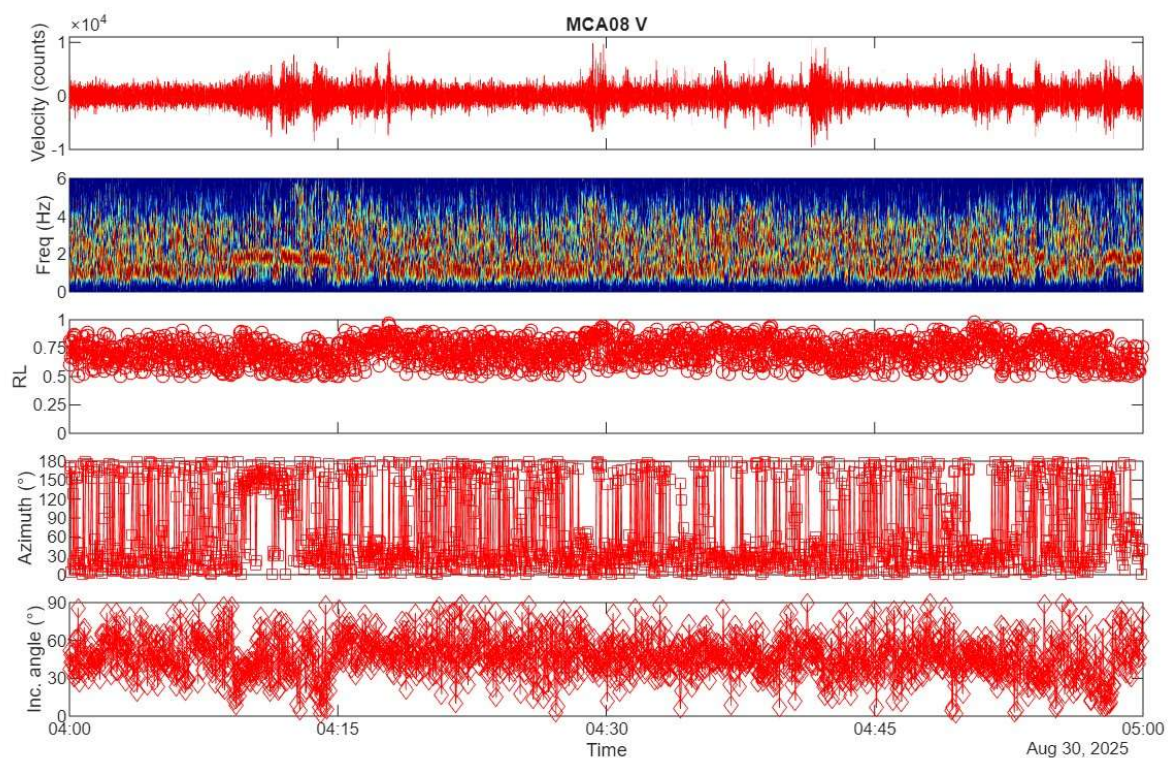

Fig. S2.

Spectrogram and polarization parameters for station MCA08 in the 1–5 Hz band. From top to bottom: vertical component of ground velocity, spectrogram, rectilinearity, azimuth, and incidence angle.
