

September 8, 2026

Dear Editor

Thank you once again for the fast handling of the review process.

Upon a final read-through, I found a few very minor typos (too few or too many spaces, missing comma or point), missing references to subsections and examples of bad language (three times "such as"). I have taken the freedom to make these corrections along with the required change to the reference which was accidentally included in an old (submitted) version.

I have chosen to upload the final word document without track changes, but can provide the version with track changes if this is desirable.

Yours sincerely,

Denise R  ther
