

**Table. S1 The numbers of PM<sub>2.5</sub>, PM<sub>10</sub> and O<sub>3</sub> pollution days in different seasons**

|  | Winter | Spring | Summer | Autumn |
|--|--------|--------|--------|--------|
| PM <sub>2.5</sub> ( $\mu\text{g}/\text{m}^3$ ) | 67     | 17     | 2      | 10     |
| PM <sub>10</sub> ( $\mu\text{g}/\text{m}^3$ )  | 44     | 7      | 0      | 9      |
| O <sub>3</sub> ( $\mu\text{g}/\text{m}^3$ )    | 0      | 7      | 33     | 3      |

The daily averaged concentrations value exceeding national air quality standards of China

**Table S2 Results of T-test and F-test**

**Table S6 Sensitivity of PM<sub>2.5</sub> pH to SO<sub>4</sub><sup>2-</sup>, NH<sub>x</sub>, NO<sub>3</sub><sup>-</sup>, Cl<sup>-</sup>, Ca<sup>2+</sup>, RH and T. The greater the relative standard deviation (RSD), the greater the impact of the variable change.**

| Impact factor  | SO <sub>4</sub> <sup>2-</sup> | NH <sub>x</sub> | NO <sub>3</sub> <sup>-</sup> | Cl <sup>-</sup> | RH    | T    | Ca <sup>2+</sup> |
|----------------|-------------------------------|-----------------|------------------------------|-----------------|-------|------|------------------|
| Winter RSD (%) | 5.83                          | 4.66            | 0.85                         | 0.96            | 4.48  | 4.38 | 3.25             |
| Spring RSD (%) | 5.58                          | 28.34           | 4.11                         | 0.23            | 10.85 | 9.22 | 8.75             |
| Summer RSD (%) | 21.79                         | 9.06            | 1.76                         | 0.06            | 12.11 | 7.13 | 6.16             |
| Autumn RSD (%) | 6.09                          | 39.77           | 9.39                         | 0.50            | 4.39  | 6.19 | 1.41             |

**Fig. S1 Ternary diagram of molar concentration ratio of SO<sub>4</sub><sup>2-</sup>, NO<sub>3</sub><sup>-</sup> and NH<sub>4</sub><sup>+</sup> in each season**

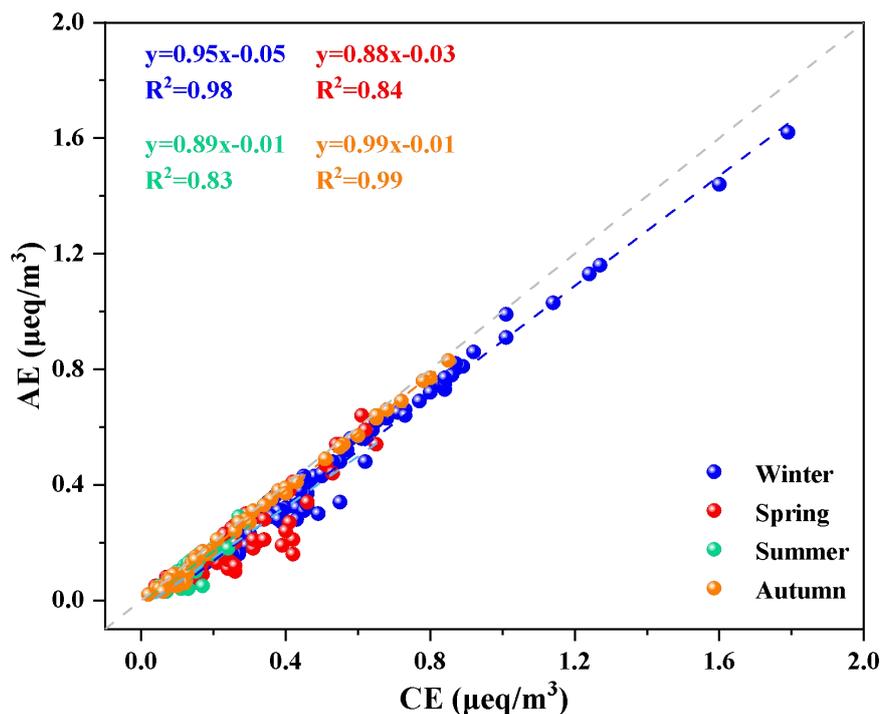

Fig. S2 Linear regression analysis of anion and cation equivalent concentration in each season

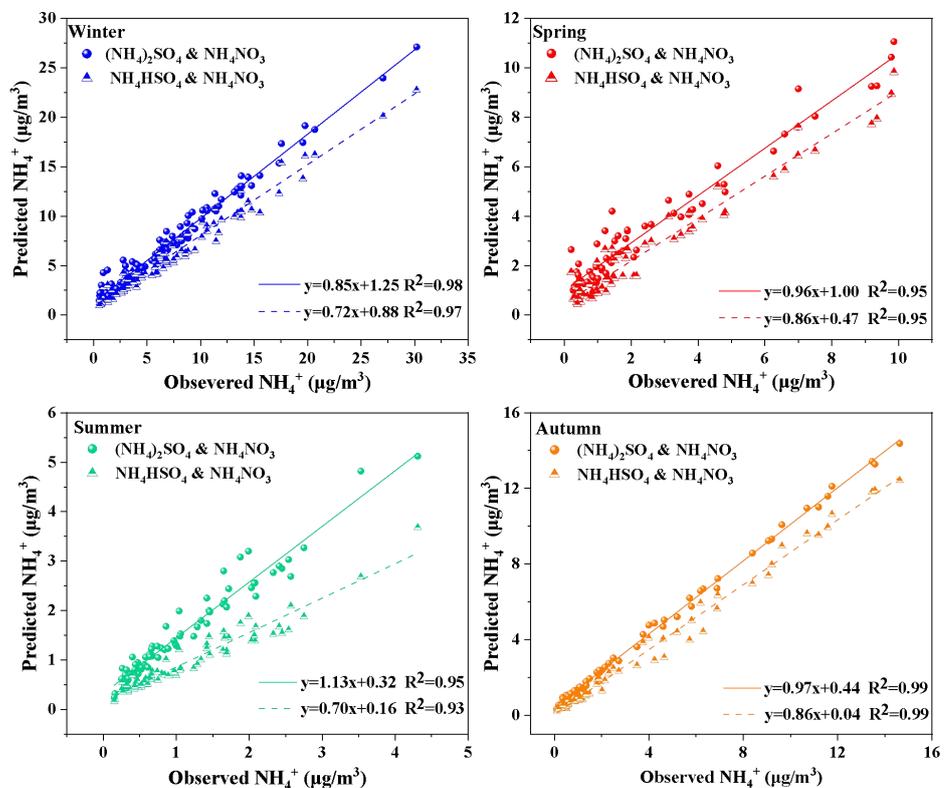

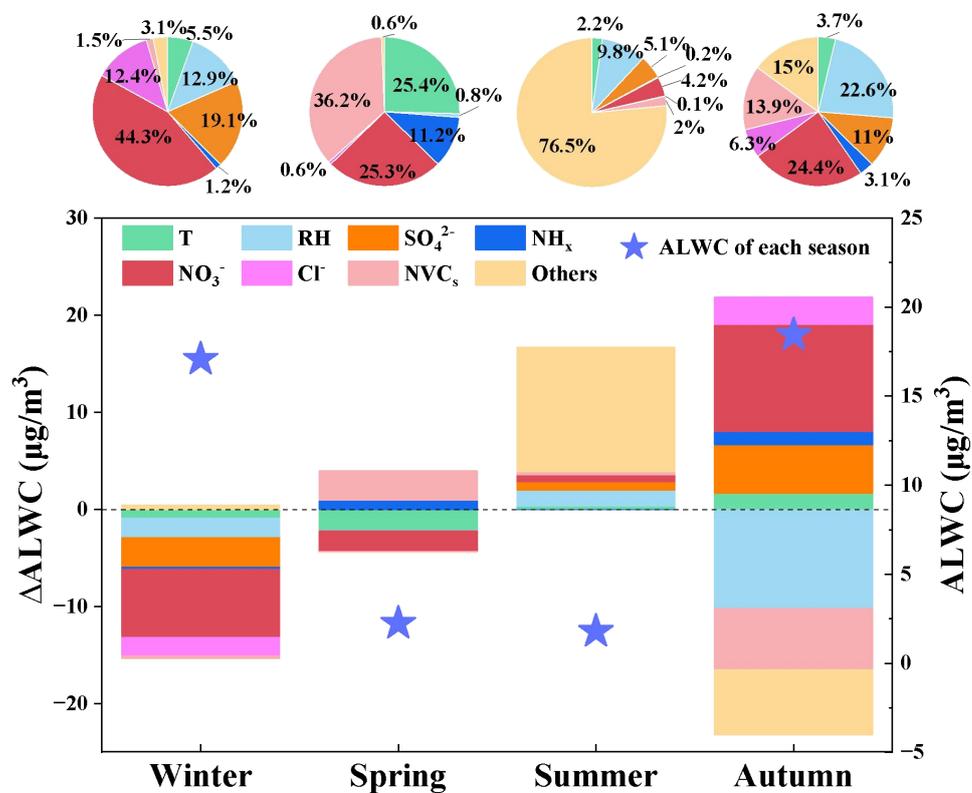

Fig. S3 Linear relationship between observed and predicted values of  $\text{NH}_4^+$

**Fig. S4** The contribution of various influencing factors to the seasonal pH. The asterisk represents the pH of aerosols in each season. The pie chart shows the relative contributions of various influencing factors to the seasonal pH (absolute values of pH was taken for pie chart).
