

Dear WCD,

As requested by the journal, I have modified Table A3 from shading to using X to mark appropriate combinations.

In the reference section, I have fixed the following references

- Andrews et al. (1987) book: added ISBN
- Elsbury et al, (2026), changed reference from preprint to published manuscript.
- Naoe et al. (2025), changed reference from preprint to published manuscript.

Thank you,

Martin
