

The authors have revised appropriately to my comments and to the suggestions by the other reviewer. I have only very minor suggestions.

L34. Insert as after acting.

L295-299. I see no reason for these two sentences. I cannot imagine an atmospheric scientist expecting a cloudiness relationship with N_{CN} or N_{CCN} . These sentences can only provide confusion to this manuscript.

L403. Insert measurements or area after Sea.

L435. Insert the before contribution.

L717. Environment plural.

L718. Remove s from plays. Role plural. Delete the. Supersaturation plural. Change 1st critical to important or remove it.
