

Response to the Editor

We thank the reviewer the comments to the first revision of the manuscript. Please, find below the answer to the suggested minor revisions.

Comments

There should be a reference to Appendix B in Section 4.2 and to Appendix C in Section 5.2 (L387).

We have added a reference to Appendix B in Section 4.2 (L338 in the new manuscript):

“For a detailed analysis of model performance across each routine and variable, Appendix B presents the decomposition of the KGE’.”

We have added a reference to Appendix C in Section 5.2 (L389 in the new manuscript):

“Although the reservoir routines evaluated in this study do not explicitly consider reservoir purpose, Appendix C shows the model performance disaggregated by the main reservoir use reported in GRanD.”

In Figure 1, the second 'e' of Degree is missing.

Corrected.

L349 the 'r' of performance is missing.

Corrected.
