

Response to Editor Report – technical corrections

Notification to the authors:

Figure 1: please note that the copyright statement "Google" and "Nasa Earth Observatory" are not sufficient. Instead, information about the imagery and map data are required - for example "Imagery © 2025 NASA, Map data © 2025 Google". Please note that "2025 NASA" and the year before "Google" are only placeholders that you need to fill with the respective imagery source and year. Please adjust the copyright statement in the map and caption accordingly. You can find more information under https://publications.copernicus.org/for_authors/manuscript_preparation.html#mapsaerials (see "Maps and aerials" > "4. Reuse of material from a map provider with copyright needed") and under <https://about.google/brand-resource-center/products-and-services/geo-guidelines/#required-attribution>.

Thank you for the notification. We have updated the copyright statement in Figure 1 caption:

"Imagery in panels h, i, and p is © 2004 NASA Earth Observatory (Blue Marble: Next Generation). Imagery in panels a-g and j-o is © 2011 Google with terrain data from the U.S. Geological Survey and National Geospatial-Intelligence Agency (GMTED2010). Basemaps are Blue Marble: Next Generation © 2004 NASA Earth Observatory (panels h, i, p) and GoogleSat © Google (all other panels)."
